

Issue #	Category	Module	Found in Release	Title	Release Note
32451	Feature Enhancement	Administration	4.3.4	Improve the GUI for maintaining default values in the data dictionary	Previously, you could only delete a default value from a data dictionary entry by using the popup box. This was not intuitive, as it was possible to delete the text representing the value from the input box. However, the value was not truly deleted with this method. Now, the functionality works similar to popup fields on the add and edit screens, so you can type in and delete values without using the popup. For multi-valued lists, you can select multiple values.
32451	Feature Enhancement	Administration	4.3.4	Improve the GUI for maintaining default values in the data dictionary	Previously, you could only delete a default value from a data dictionary entry by using the popup box. This was not intuitive, as it was possible to delete the text representing the value from the input box. However, the value was not truly deleted with this method. Now, the functionality works similar to popup fields on the add and edit screens, so you can type in and delete values without using the popup. For multi-valued lists, you can select multiple values.
32447	Product Bug	Search / Report	4.3.4	Problems creating summary reports when name of field is exactly 30 characters long	This was a boundary condition in the code. This has been fixed.
32570	Product Bug	Search / Report	4.4	Chart Image Dimensions for Width And Height caused an exception, if their value was set to 0	The values for the width and height of charts is now limited to a range of 100 to 1600 pixels
32627	Product Bug	Administration	4.3.4	Module Name Administration - The owner of the module was termed User ID on one screen, and termed Owner on another screen	Within the list of modules under each product, the correct term of Owner was used. This was termed User ID on the Add and Edit screens. This was changed for consistency.
32665	Product Bug	Administration	4.3.4	Error message when adding a new allowed value type can be misleading	The error message indicated that all errors were due to duplicate entries. The message has now been changed to "ExtraView was unable to add your entry. Please make sure that your entry does not exist already".
32666	Product Bug	Administration	4.3.4	2-257 The window size of "Lookup User Account Directory" is small.	If the behavior setting for user lists was set to POPUP, and you tried to select the default value of a user field such as ASSIGNED_TO or CONTACT in the data dictionary, the popup window was sized too small. The window has been enlarged.

32668	Product Bug	Allowed Values	4.3.4	QA_B12_SQL_Cnk-Administration-Fields-Allowed Value Types-New allowed value type is added to the database without giving Parent database name as Parent database name is mandatory field and showing in red color.	When adding a new allowed value type, it was not clear that new types could be created without a parent. When this occurs, you are creating a valid allowed value type in order that you can eliminate values from the list that were to be deprecated. This has been clarified on the GUI.
32684	Product Bug	API & CLI	4.3.4	Display type of "Print Text" and HTMLArea did not get returned in the XML from the "run_report" API call	This was a bug which has been rectified
32684	Product Bug	API & CLI	4.3.4	Display type of "Print Text" and HTMLArea did not get returned in the XML from the "run_report" API call	This was a bug which has been rectified
32687	Product Bug	Import and Export	4.3.2	Import Wizard Error	When importing to a business area that used embedded layouts, the processing could fail with a program exception. Although this was not the recommended or documented method of importing to a system, this error has been handled and corrected.
32747	Product Bug	Charts	4.3.4	When two or more entries in the Project Field are selected in advanced filter queries, no results are returned	This worked fine with the selection of single projects or all projects, but not with individually selected projects. Now fixed.
